### ADMINISTRATOR'S REPORT April 2006

#### Subarea Health Planning Councils (SACs) Activities

- Hawai'i** Health Trends in Hawai'i 2006 was distributed to the members and a variety of Hawai'i County health data were discussed. Although the data show that Hawai'i County has more primary care providers, there are fewer specialty providers across the board. Long-term care occupancy is high in the county. County health care needs will be integrated into the H2P2 planning process. The SAC will be involved in identifying Hawai'i County service and facility needs and priorities over the next year.
- Honolulu** No March meeting.
- Kauai** No March meeting.
- Tri-Isle** Mike Foley, Director of the Maui County Department of Planning, described the process for developing the general plan for the county through 2030. They will also work on nine community plans that are more detailed. The county planning department is looking comprehensively at the impact of all proposed projects, cumulatively, on roads, traffic and water supply. Central Maui is the most active construction area for the next five years. None of the infrastructure components currently have an adequate source of funding to support their growth, modernization and maintenance.
- West Oahu SAC & Windward Oahu SAC** No March meeting.
